

Bolts and Connectors

Overview

These high quality connectors are designed to interlink cells within industrial and traction batteries. They are manufactured from copper cable which has been fully encased in acid resistant rubber providing maximum protection against corrosion and making the connector more durable, secure and easy to manoeuvre. Our connectors are available in a variety of widths and in lengths to suit your specific requirements.

Bolted Connectors

Width 25mm²

Length	Product Code
75mm	BCW02500075

Bespoke Harnesses

Battery Components also offers a Complete Harness Service. Simply let us know the specifications of the harness e.g. cable diameter, cable length and the make and model of plug you require and we will reply with a quotation.
